

Polarization Beam Splitter / Combiner

Beam Combiner/ Splitter Polarization Beam Splitter/Combiner Polarization beam splitter can be used as beam splitters or beam combiners. The output beam which are parallel to input beam is called p-polarized beam while the orthogonal output beam is defined as s-polarized beam. The polarization beam splitter plates are available for red, blue, and green lasers, you can choose the one you require, we will offer our customer the solution for the beam combining.

Part No.	Size (mm)	Application
PBS-RS	15x30x2	For red laser combining
PBS-RR	· 15 x 2	
PBS-BS	15x15x2	For blue laser combining
PBS-BR	· 15 x 2	
PBS-GS	15x15x2	For green laser combining
PBS-GR	· 15 x 2
