Disposable haemocytometer

Single-use counting chamber for manual cell counts under a microscope.

Cell counting

Features

- Four enclosed counting chambers for manual microscope counting.
- An engraved Neubauer Improved grid and defined chamber depth set the counting volume.
- Individually packaged slides require no coverslip or washing after use.

Technical specifications

Dimensions	25 × 75 × 2 mm
Chambers	Four
Counting grid	Neubauer Improved
Chamber depth	100 µm
Loading volume	20 µL/chamber
Stain	Trypan blue
Packing	50 individually packaged slides / 200 tests

Applications

- Manual cell concentration and viability checks under a microscope.

Configurations and accessories

- Specify the Neubauer Improved grid version and the number of slide boxes.
